---

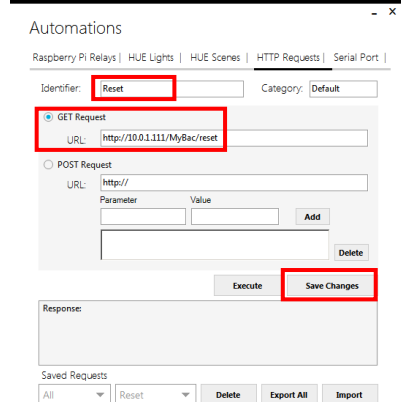

## Sending Events to BAC

From the main menu select Automations

Select the HTTP Requests tab

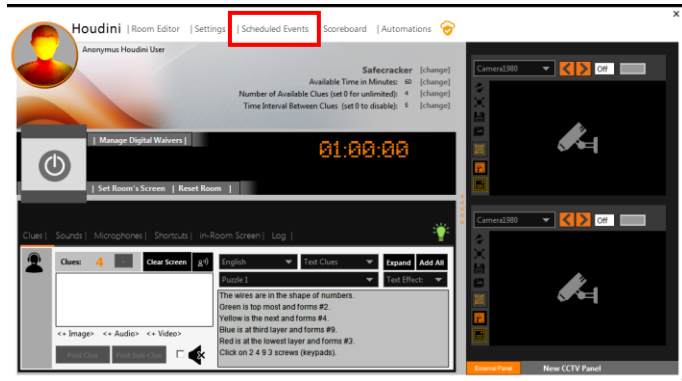

Create an HTTP request for each command you want to send to the BAC.

The get request has the form `http://[BAC IP Address]/[BAC Command]`

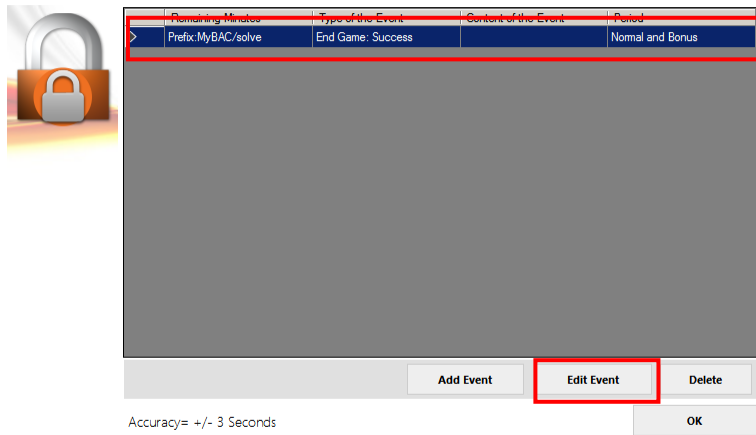

For a list of available commands see the Network Commands document.

# Game Start Event

To add an initialization event (when the game starts), open Scheduled Events from the main menu

## Scheduled Events | Export Events | Import Events

Why can't I set an event to start at the end of the game ?  
These events depend on the result of the game (Success or Fail). To set an ending event go to "Settings->Customize Theme" Tab.

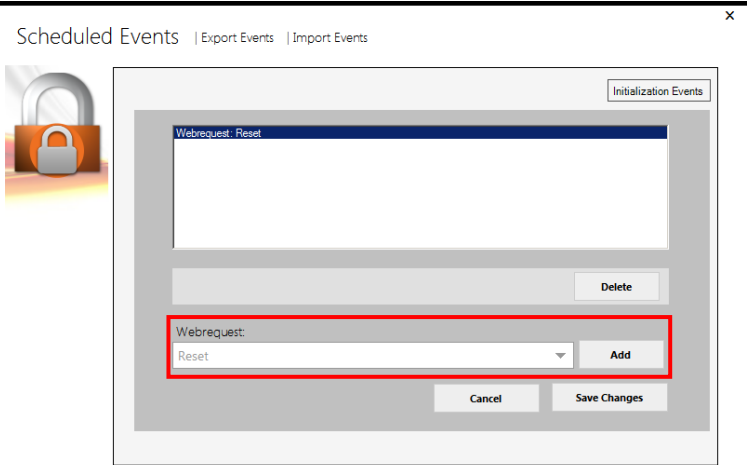

Edit any event

## Scheduled Events | Export Events | Import Events

Why can't I set an event to start at the end of the game ?  
These events depend on the result of the game (Success or Fail). To set an ending event go to "Settings->Customize Theme" Tab.

Select Initialization Events

Why can't I set an event to start at the end of the game?  
These events depend on the result of the game (Success or Fail). To set an ending event go to "Settings->Customize Theme" Tab.
